

Human Rights Council
Working Group on the Universal Periodic Review
Twenty-seventh session
1-12 May 2017

Summary of other stakeholders' submissions on Brazil*

Report of the Office of the United Nations High Commissioner for Human Rights

I. Background

1. The present report was prepared pursuant to Human Rights Council resolutions 5/1 and 16/21, taking into consideration the periodicity of the universal periodic review. It is a summary of 53 stakeholders' submissions¹ to the universal periodic review, presented in a summarized manner owing to word-limit constraints.

II. Information provided by stakeholders

A. Scope of international obligations² and cooperation with international human rights mechanisms and bodies³

2. Regarding recommendations 119.7 and 119.8,⁴ Joint Submission (JS)16 stated that Brazil has yet to ratify the International Convention on the Protection of the Rights of All Migrant Workers and Members of Their Families owing to a failure on the part of both parliamentarians and the Federal Government to prioritize the issue.⁵ JS9 noted that the adaptation of its legislation in line with the provisions of the Palermo Protocol was still pending.⁶

3. Regarding recommendation 119.10,⁷ JS18 noted that Brazil committed to ratifying ILO Convention No. 87 concerning freedom of association and protection of the right to organise; however, Brazil had not implemented the recommendation.⁸

B. National human rights framework⁹

4. JS11 asserted that Brazil has regressed 20 years in institutional terms since the Human Rights Secretariat lost its ministerial status and became a special secretariat within the entity now called the Ministry of Justice and Civic Affairs. The Ministry has taken steps to freeze spending by means of Order No. 611/2016, which has an impact on all the Secretariat's resources, now that it no longer has ministerial autonomy.¹⁰

* The present document was not edited before being sent to United Nations translation services.

5. Regarding recommendations 119.4 and 119.5,¹¹ Centro de Estudos sobre Justiça de Transição (CJT) noted that it had been recommended that Brazil fully align its national legislation with all obligations under the Roma Statute; however, Brazil did not adopt specific legislation in order to incorporate its obligations.¹²

C. Implementation of international human rights obligations, taking into account applicable international humanitarian law

1. Cross cutting issues

*Equality and non-discrimination*¹³

6. JS6 reported that cases of racism and discrimination against indigenous persons and peoples had increased. The action of parliamentarians from the ruralist and anti-indigenous groups had grown over the last four years, part of a context involving attempts to erode indigenous rights and propagate untruths against indigenous peoples.¹⁴

7. JS15 reported the humiliation, the fear and the physical and psychological intimidation suffered by LGBT people, including young people and teenagers in school and university environments and the discrimination suffered by homo-affective families.¹⁵

*Development, environment and business and human rights*¹⁶

8. JS11 claimed that the new Government has put forward proposals to “amend” the Constitution that effectively undermine safeguards of rights, such as proposed constitutional amendment No. 55/2016,¹⁷ which would freeze social spending for 20 years and delink mandated expenditures on education and health.¹⁸

9. JS9 stated that if the PEC55 passed it will disrupt the financing of Brazilian social policies by eliminating the earmarking of revenues for education and the social protection budget, comprised of health policies, social security and social assistance.¹⁹

10. Global Compact stated that Brazil should support initiatives and strategies to combat discrimination and promote the inclusion of people with disabilities, women, LGBT, refugees, developed by companies and the various levels of government, in cooperation with civil society.²⁰ It noted that Brazil should promote the UN Guiding Principles on Business and Human Rights to government bodies that were not traditionally active in the area of human rights.²¹

11. JS14 stated that Brazil faced many human rights and environmental challenges, for example in the recent cases of dams rupture happened in Jacarei or Mariana, questioning the effectiveness of Brazilian legal prevention mechanisms, pollution control and the environmental liability law.²²

12. In the case of Mariana, JS22 noted that a settlement agreement “Term Adjustment of Conduct” between the three companies and Brazilian authorities was suspended by a ruling of the Superior Court of Justice, dated July 2016. This decision was based on the Brazilian State’s duty to repair, as well as the illegitimacy of an agreement that did not involve the meaningful participation of communities.²³

13. JS22 reported the scrapping of the environmental monitoring activity capacity with the reduced number of civil servants in charge of monitoring the environmental licensing of polluting activities, as well as the environmental management of its impacts.²⁴

14. JS14 asserted that human rights were violated in the Brazilian Amazon as a result of illegal burning.²⁵ JS22 drew attention to the Proposed Amendment to the Constitution (PEC) No 65/2012 as one of the main signs against the protection of the environment and human rights, as it reduces the environmental licensing procedure from three to one single step.²⁶ Oceania Human Rights (OHR) raised the issue of climate change and human rights.²⁷

Human rights and counter-terrorism

15. JS18 noted that although the newly adopted Anti-Terrorist Law explicitly states that its provisions “do not apply to the individual or collective behaviour of persons involved in political demonstrations or social, union, religious, class or professional movements moved by social or petitioning aims”, it was feared that its wide definition of what constitutes a terrorist act could be used against human rights defenders.²⁸ JS 24 stated that, despite some changes, the Anti-Terrorism law still presented substantial risk to the right to protest and to social movements’ freedom of assembly.²⁹

2. Civil and Political Rights

*Right to life, liberty and security of the person*³⁰

16. Amnesty International (AI) noted that Brazil supported recommendations to take measures aimed at ending extrajudicial executions by the security forces; however, killings at the hands of the police had continued, particularly in the context of the so-called “war on drugs”. Counter-narcotic operations in *favelas* (urban slums), had been accompanied by the use of force, in many instances, resulting in an excessive use of force or extrajudicial executions.³¹

17. CONECTAS acknowledged that Brazil had taken a symbolic step towards putting an end to the ‘resistance’ classification in police reports used to cover up executions. The joint resolution of the Higher Police Council and the National Council of Civil Police Chiefs, also established the procedures to be followed in cases of deaths or bodily injury caused by police officers.³² CONECTAS asserted that to stop executions by police, some measures were needed: independence of forensic bodies; independent internal affairs bodies and ombudsman; police oversight by the Public Prosecutor’s Office; reform of the model of militarized policing; and ending the ‘resistance’ classification³³

18. JS6 and Unrepresented Nations and Peoples Organization (UNPO) noted the violence perpetrated against indigenous communities with impunity, unjustified imprisonments and deaths of indigenous leaders, in a context of disputes over their territorial rights.³⁴ Davida: Prostituição, Direitos Cívicos e Saúde (DAVIDA) reported human rights violations by police officers, especially against trans-sex workers.³⁵

19. JS18 stated that excessive force and arbitrary arrest were used against demonstrators during the 2013 anti-government protests, the 2014 Football World Cup, and during the 2016 Rio Olympics. Violations included the failure of police to identify themselves, arbitrary detentions, disproportionate deployment of police officers, disproportionate use of less-lethal weapons and, in at least four demonstrations, the use of lethal weapons.³⁶ JS21 and AI reported that journalists covering these demonstrations faced destruction of their equipment, prevention from covering the protests, physical violence and arbitrary detentions.³⁷

20. AI noted that Brazil further committed to take measures to combat and prevent torture and other ill-treatment; however, torture and violence remained endemic in Brazil’s prisons as did severe overcrowding and degrading conditions. In Pedrinhas prison 60 detainees were killed by other detainees in 2013.³⁸ Omega Research Foundation noted that Brazil received recommendations regarding measures to prevent and combat torture; however, people in places of detention were regularly subjected to torture and other forms of ill-treatment.³⁹

21. AI stated that Brazil supported recommendations to guarantee the independence and autonomy of the national preventive mechanism; however, Brazil’s national preventive mechanism did not comply with international standards in terms of its independence.⁴⁰ Omega Research Foundation asserted that the National Mechanism was under-staffed and its functional independence could be compromised due its workspace and a sole source of funding.⁴¹ CONECTAS stated that the Federal Government must facilitate and finance the creation of integrated state systems against torture.⁴²

22. JS17 noted that the National Penitentiary Department revealed that in December 2014, there were 622,202 people in prison, making it the fourth largest prison population in

the world.⁴³ JS 17 added that women represented 5.8% of the total prison population and the growth rate of the number of women in jail was alarming.

23. Around 64% of the crimes for which women were detained were related to drug trafficking. It reported the aversion of women to serving sentences in the open system in São Paulo due to being sexually abused by correctional officers.⁴⁴ Association “Comunita Papa Giovanni XXIII (APG23) noted problems of social integration of prisoners and their families.⁴⁵ JS17 highlighted that young black persons were overrepresented in the penitentiary system.⁴⁶

24. Human Rights Watch (HRW) noted that juvenile centers held close to 22,000 children in 2014, but had capacity for only 18,000.⁴⁷ JS20 noted that there were frequent cases of uprisings, escape, torture and ill-treatment, overcrowding, lack of access to medical treatment and denial of the right to education. Violations were reported in Ceará, Rio Grande do Sul and Pernambuco.⁴⁸

*Administration of justice, including impunity, and the rule of law*⁴⁹

25. HRW highlighted that the prosecutor’s offices in a few states had taken important steps to address police violence by establishing special units to investigate cases of police abuse; however, further steps should be taken to implement recommendations 119.65, 119.122 and 119.123.⁵⁰

26. JS17 noted that the introduction of custody hearings in Brazil was important regarding pretrial detention, and tackling prison overcrowding. Through custody hearings, it is mandatory to bring the detainee before a judge up to a maximum of 24 hours after the arrest, ensuring an effective control of the legal basis of the detention.⁵¹ CONECTAS added that it could be a tool in preventing street torture.⁵² JS17 stated that the Supreme Court decision that custody hearings must be established in all the territory remained unobserved.⁵³

27. JS17 acknowledged the law 12.403/2011 which made available a series of alternative measures determining that judges observe the necessity of pretrial detention.⁵⁴

28. Associação Juízes para a Democracia (AJD) reported violations of the functional independence and freedom of expression of judges working in the area of civil liberties.⁵⁵

29. JS24 reported that impunity was a major factor that indirectly promoted violence against journalists.⁵⁶ JS2 noted that Brazil accepted recommendations on combating impunity; however, of the 25 print and internet journalists and bloggers killed between January 2004 and August 2016, 21 cases remained unpunished.⁵⁷

30. JS6 and JS7 reported that the judgment on the Raposa Serra do Sol case by the Federal Supreme Court resulted in a growth of legal actions against demarcations of indigenous lands.⁵⁸ JS7 warned that in most actions the indigenous peoples were not even called to be parties in such cases and defend or express themselves.⁵⁹

31. JS21 noted that the legal instrument known as a “suspension of preliminary injunction”, which gives the State the right to petition directly to the Presidents of the High Courts for the suspension of preliminary court orders, on the grounds of public interest, had been used to ensure the undertaking of large-scale constructions.⁶⁰

32. Regarding the right to truth, CJT noted that the judiciary was a barrier in the search for criminal responsibility for human rights violations; therefore recommendation 119.115⁶¹ had not yet been followed.⁶²

33. HRW observed little progress in prosecuting those responsible for atrocities committed by state agents during the military dictatorship period (1964-1985).⁶³ CJT acknowledged that the delivery of the *Comissão Nacional da Verdade’s* (CNV) final report in December 2014 was a mark in the history of the truth-seeking process in Brazil; however recommendations 119.124, 119.125 and 119.126⁶⁴ had been partially implemented.⁶⁵

*Fundamental freedoms and the right to participate in public and political life*⁶⁶

34. Reporters Without Borders (RSF-RWB) acknowledged the law on access to public information as exemplary legislation, but asked for its correct implementation at the state and municipal levels.⁶⁷

35. Regarding recommendation 119.130⁶⁸ on freedom of expression, JS18 noted a mixed implementing record; while in 2014 the so-called Marco Civil da Internet, was a decisive step forward, bill 215/2015, under consideration by Congress, would be a setback.⁶⁹

36. RSF-RWB acknowledged that the *Marco Civil da Internet* that regulates the Internet and protects online privacy and free speech put Brazil at the forefront of online civil rights protection in Latin America.⁷⁰ JS2 acknowledged that Brazil had emerged as a global champion of digital rights.⁷¹ Meanwhile, JS24 reported that the implementation of the *Marco Civil da Internet* had been inadequate.⁷² AccessNow expressed that some articles could negatively impact internet users' rights.⁷³

37. JS2 noted that Judiciary had clashed with large technology companies.⁷⁴ JS24 indicated that in 2015 and 2016, courts authorised blocking the mobile telephone application WhatsApp, because it refused to provide access to users' conversations for criminal investigation.⁷⁵ AccessNow noted that although higher courts' decisions overturned them; they had serious negative impacts.⁷⁶

38. JS18 noted that Brazil received twelve recommendations on the protection of human rights defenders, journalists and civil society and five concerning indigenous peoples; none of the recommendations had been fully implemented.⁷⁷

39. JS24 noted that the violence against journalists had increased, reporting that in 2015 the number of violations increased by 67% in comparison to 2014.⁷⁸

40. JS2 welcomed the establishment of a working group to investigate attacks on the press and provide recommendations.⁷⁹ RSF-RWB noted that Brazil had implemented none of the recommendations of the working group's final report.⁸⁰

41. JS18 reported that Brazil's National Programme for the Protection of Human Rights Defenders was restructured by decree in 2016; meanwhile a law introduced in Congress in 2009 in order to institutionalise the program had not been passed.⁸¹ JS2 considered that this Programme failed to address the systemic reasons behind the violence.⁸²

42. JS18, JS21 and Cultural Survival stated that targeted extra-judicial killings of indigenous and environmental rights defenders had continued.⁸³ JS6 indicated that some indigenous persons registered under the Protection Program had denounced the program's lack of effective support.⁸⁴ DAVIDA registered the case of a sex worker leader who was denied entrance into the National Program to Protect Human Rights Defenders.⁸⁵

43. JS24 reported the National Plan for Community Broadcasting Concessions of 2015 required better coordination of the allocation of frequencies to community radios.⁸⁶

44. JS6 and Cultural Survival reported that for 30 years Brazil has had only one indigenous representative in the National Congress.⁸⁷

*Prohibition of all forms of slavery*⁸⁸

45. JS9 asserted that Brazil became an international reference in the fight against forced labour.⁸⁹ JS13 stated that there were still people in situations of slavery in Brazil, most of them in rural areas but also some in the textile and construction industries in urban areas.⁹⁰

46. JS13 asserted that Brazil has gone ahead with the constitutional amendment authorizing the expropriation of properties where slave labour is observed; however, regulations have yet to be adopted. JS13 noted that there are groups in Congress who wish to amend the concept of "slave labour" contained in article 149 of the Criminal Code to exclude degrading conditions and overwork.⁹¹ Dominicans stated that the number of labour inspectors has fallen considerably.⁹²

47. JS13 stated that the “dirty list” of slave labour developed by the Ministry of Labour in 2003 was one of the most innovative strategies for combating modern slavery. Since December 2014, publication of the list has been blocked by judicial order.⁹³ Dominicans stated that in May 2016, following long governmental negotiations, a new list was drawn up on the order of the Ministry of Labour.⁹⁴

*Right to privacy and family life*⁹⁵

48. JS5 stated that regarding the recommendation on the right to privacy and women, there was no specific law guaranteeing the right to privacy and confidentiality in gender related violence.⁹⁶ JS5 observed the trend by law enforcement agencies to use the expansion of digital communications to interfere with privacy.⁹⁷

3. Economic, Social and Cultural Rights

*Right to work and to just and favourable conditions of work*⁹⁸

49. JS13 noted that degrading working conditions were common in infrastructure projects in remote locations, such as the Santo Antônio/Jirau factory in the north of the country, where substandard housing conditions and overwork had caused workers to riot in protest of their working conditions.⁹⁹

50. JS13 reported that the southern region of Minas Gerais has seen the largest number of cases of slave-like working conditions in Brazilian coffee plantations, including ones that have been certified and have received awards for the production of so-called sustainable coffee.¹⁰⁰

*Right to social security*¹⁰¹

51. JS9 warned that if PEC55 passed, it will disrupt the financing of Brazilian social policies by eliminating the earmarking of revenues for education and the social protection budget, comprised of health policies, social security, and social assistance.¹⁰²

52. JS11 highlighted the social inclusion processes carried out in recent years through cash transfer policies, real increases in the minimum wage and the existence of social security schemes. It warned that PEC55 would freeze social spending for 20 years and that social security entitlements would be restricted.¹⁰³

53. JS13 indicated that when rural workers wish to claim their right to retire by submitting a declaration of rural activity, in many cases the landowners who hired them informally refuse to issue that document, thereby making it difficult for rural workers to substantiate their decades of rural labour with the National Social Security Institute.¹⁰⁴

*Right to an adequate standard of living*¹⁰⁵

54. JS6 highlighted that despite advancing in the reduction of poverty, especially through income transfer programs, Brazil had failed to identify and fully meet the specificities of the cases of indigenous peoples and promote an effective improvement in living conditions, without imposing an alien way of life.¹⁰⁶

55. In relation to recommendations 119.131 and 119.145,¹⁰⁷ JS9 noted that the failure to implement necessary measures to protect and promote the access to land of traditional peasant, indigenous and quilombola communities had led to numerous human rights violations; in particular, the rights to an adequate standard of living, adequate housing, food and water.¹⁰⁸

56. JS3 was concerned by the Proposed Amendment to the Constitution PEC55 which determines that no investment in social areas may exceed the inflation adjustment for 20 years.¹⁰⁹

*Right to health*¹¹⁰

57. JS9 noted that the Unified Health System was currently being dismantled through various proposals to limit its scope or to privatize it.¹¹¹ JS26 reported challenges such as

unjustifiably high prices of medicines that threatened public health system sustainability and access to medicines.¹¹²

58. JS26 expressed that despite the HIV/AIDS universal access policy being guaranteed by law, the infection rate had risen, public HIV/AIDS treatment was financially undermined and the mortality rate had risen in some regions.¹¹³

59. In relation to the recommendation on sexual and reproductive rights JS4 drew attention that Brazil had restrictive legislations. Abortion was only allowed in cases involving either risk to the woman's life or rape, and in cases of foetal anencephaly.¹¹⁴ Center for Reproductive Rights (CRR) asserted that Brazil continued to actively prosecute women who had unlawful abortions.¹¹⁵ JS1 noted that access to legal abortion was not always available for victims of sexual violence.¹¹⁶

60. JS4 referred to conservative forces in Congress against sexual and reproductive health, as part of a political strategy organized under the "right to life of unborn children".¹¹⁷

61. CRR reported that in the north-east (the poorest and least developed region of Brazil), two-thirds of pregnancy-related deaths occurred as a result of unsafe abortions.¹¹⁸

62. CRR acknowledged various maternal health policies to address maternal health care more generally; however, a number of these policies were formulated from the perspective of the foetus rather than from the perspective of the woman.¹¹⁹

63. Regarding Zika-related microcephaly, JS4 and CRR stated that Brazil runs the risk of counteracting the measures needed to guarantee women's sexual and reproductive health, as expressed by the World Health Organization and the Office of the United Nations High Commissioner for Human Rights.¹²⁰ With a different position, ADF International expressed that liberalization of the law did nothing to prevent the spread of the virus.¹²¹ JS4 and CRR noted that the Brazilian Ministry of Health published its most recent guidelines in response to Zika-related microcephaly, which correctly recognized that proper contraceptive use will play a large role in curbing the impact of the Zika epidemic; however, it failed to address the barriers for poor, Afro-Brazilians and young women.¹²²

64. JS6 acknowledged some progress with the creation of a subsystem of indigenous healthcare; however, indigenous peoples denounced cases of irregularities in the healthcare services and a lack of effective indigenous monitoring of the system.¹²³

65. Cultural Survival stated that the First National Survey of Indigenous People's Health and Nutrition in Brazil concluded that the disproportion of sick indigenous children represented the lack of medical services and sanitation accessible to indigenous communities.¹²⁴

66. JS27 observó que la alarmante situación de salud en las comunidades Kanamari del medio río Juruá.¹²⁵ Hutukara Associação Yanomami (HAY) considered that Brazil should ensure Yanomami's and Ye'kwana's participation at Brazil and Venezuela bi-lateral talks concerning the protection of their territories and improving their health conditions.¹²⁶

*Right to education*¹²⁷

67. JS3 acknowledged that the National Education Plan (NEP) 2014-2024, represented an important achievement, and was an important planning tool.¹²⁸

68. Instituto de Desenvolvimento e Direitos Humanos (IIDH) pointed to the challenge of developing indicators for use in monitoring and assessing policies on human rights education.¹²⁹

69. Marist International Solidarity Foundation (FMSI) acknowledged that the dropout rate at the primary and secondary levels fell between 2008 and 2013; however, the dropout rate remains a concern.¹³⁰

70. JS3 warned that the advancement of the private sector in virtually all stages and types of education contributed to increased educational inequalities and the weakening of the public sector. The sale of private systems of standardized teaching and packages for planning and management to public schools was worrying.¹³¹

71. JS3 noted that Brazil had not accomplished recommendations 119.33, 119.47, and 119.94¹³² on gender equality, since the withdrawal of gender and sexuality related issues from education plans. Under pressure from religious leaders, local representatives in at least 12 of the 27 Brazilian states removed from Education Plans strategies aimed at overcoming gender, sexual orientation and race inequalities.¹³³ JS15 noted the exclusion suffered by LGBTI people in school and universities environments.¹³⁴

72. JS15 drew attention that the “School without Party” Program law projects attacked basic human rights such as the right to freedom of expression and the right to education, failing to ensure school as a plural space of knowledge.¹³⁵

73. JS15 acknowledged the advance expressed in national indicators on education related to access of women to schooling; however, this achievement was insufficient to affirm that Brazil had reached equity between men and women in education.¹³⁶

74. JS6 noted that only around 30% of indigenous schools used indigenous languages in their teaching.¹³⁷ JS10 asserted that education in indigenous villages had been characterised by the low quality of teaching, precarious infrastructure and an absence of pedagogical practices specific to indigenous contexts.¹³⁸

75. JS10 considered that although under suspicion, the proposal to create the Ethnoeducational Territories represented an innovation, revealing a proactive stance on the part of the Ministry of Education (MEC) in seeking to organise a model that brings together representatives of the federal government, the education systems, indigenous teachers, civil society and universities.¹³⁹

76. JS27 reported that not a single school had been built in Kanamari communities by the municipalities of the region.¹⁴⁰

77. JS3 and JS25 acknowledged that Brazil had made important legal progress regarding afro-descendent education; however, there were various limits of this advance, therefore Brazil did not accomplish recommendation 119.159.¹⁴¹

78. JS19 considered that recommendation 119.158¹⁴² had not been implemented fully. In rural areas, it noted students and teachers traveled long distances to arrive at schools, had inadequate school buildings, infrastructure, access to internet, or even electricity.¹⁴³

4. Rights of specific persons or groups

*Women*¹⁴⁴

79. JS3 noted the lack of policies to face gender inequalities also reflected on violence against women, which, in 2013, was responsible for the death of about 5,000 women. In the same year, 500,000 cases of rape or attempted rapes were reported.¹⁴⁵

80. JS1 reported that only 35 percent of rape cases were reported mostly due to lack of faith in a justice system that will take claims seriously. This was underscored by a recent report on attitudes towards gender based violence in which one third of the Brazilian population considered women guilty when raped.¹⁴⁶

81. Regarding recommendation 119.90,¹⁴⁷ JS19 noted that Brazil was still lacking in specialized courts to care for women who were the victims of violence. There are 66 such courts, but according to the National Justice Council there should be at least 120 in the country.¹⁴⁸

82. JS6 perceived a worsening of cases of violence against indigenous women, including sexual violence. The national policies for combating discrimination and violence against women were unable to approach the issue with specific attention to the context of indigenous peoples. There was a tendency for the situation to worsen with the reduction in the status of the Ministry of Policies for Women to a subarea of the office for human rights.¹⁴⁹

*Children*¹⁵⁰

83. JS19 welcomed the measures in compliance with recommendation 119.129,¹⁵¹ supporting birth registration by placing notaries in maternity wards and setting up the National Information System of Civil Registry.¹⁵²

84. JS20 noted with concern that the Chamber of Deputies approved, in the second round of voting, constitutional amendment No. 171/1993, which will lower the age of criminal responsibility from 18 to 16 years for certain offences and that the Senate has adopted a proposal to increase the limit on prison terms for adolescents from 3 to 10 years.¹⁵³ HRW and JS19 reported that if it is enacted, it would violate international norms, which hold that people under 18 should not be prosecuted as adults.¹⁵⁴

85. JS19 noted that the situation of vulnerable black and indigenous children showed that many measures must still be implemented in order to follow recommendation 119.162¹⁵⁵ accepted by Brazil.¹⁵⁶

86. JS19 noted that Brazil had allowed all cases of violence to be reported directly to authorities by means of the Dial 100 program. It had increased reporting, but there was a lack of follow-up.¹⁵⁷

87. JS19 congratulated Brazil in its successful efforts to implement recommendation 119.152¹⁵⁸ about child mortality. It was achieved with the help of the Bolsa Familia program, which provided mothers and their new-borns with primary health care.¹⁵⁹

88. JS23 warned about the lack of enforcement of indicative ratings, the broadcasting of police programmes and the excessive amount of advertisements geared towards children in the media.¹⁶⁰ JS23 reported that the High Court of Justice has ruled that the mere fact that an advertisement is targeted at children makes it abusive and illegal.¹⁶¹

*Persons with disabilities*¹⁶²

89. HRW acknowledged that Brazil had taken positive measures that address recommendations received during the previous UPR, such as the 2015 disability rights law.¹⁶³

90. FMSI mentioned the percentage distribution and number of public schools that are not accessible for persons with disabilities or do not have adapted toilet facilities. It noted that in 2013, 68,116 of 70,330 rural schools (96.85 per cent) were not accessible for persons with disabilities or did not have adapted toilet facilities. In urban areas, 62,429 of 82,879 public schools (75.33 per cent) were in this situation.¹⁶⁴

*Minorities and indigenous peoples*¹⁶⁵

91. JS6 reported emblematic cases involving the violation of the right to consultation to indigenous peoples, such as Belo Monte, Teles Pires and São Manoel Hydroelectric Dams, the Tapajós Dam project, and more than 100 law bills and constitutional amendments designed to alter indigenous rights currently passing through Congress without consultation.¹⁶⁶

92. JS8 noted that bilateral agreements between the Governments of Peru and Brazil are being implemented without adequate consultation.¹⁶⁷

93. AI noted that despite Brazil's commitment to continue the demarcation process of Indigenous lands, progress had been slow. Several demarcation processes were pending, and had been blocked by legal challenges; others were awaiting approval by the executive or were at the stage of technical assessment by the Federal Indigenist Agency (FUNAI).¹⁶⁸ Society for Threatened Peoples Switzerland STP CH reported that Brazil failed to comply with recommendations 119.164, 119.165, 119.167 and 119.168.¹⁶⁹

94. JS9 expressed concern that the traditional peasant, indigenous and quilombolas communities were weakened by the slow implementation of the policies relating to the demarcation of their territories.¹⁷⁰ JS6 (7) stated that there had been no progress in the demarcation of Guarani Kaiowá indigenous lands.¹⁷¹ JS28 reported that demarcation has not taken place in Guaira or Terra Roxa (Paraná).¹⁷² JS6 (6) and Cultural Survival (4) expressed

that the stagnation in the demarcations was accompanied by the growth of large scale agribusiness and extractive projects.¹⁷³

95. UNPO and other organizations¹⁷⁴ noted that Congress was increasingly dominated by a “ruralist bloc”, pushing for laws such as the PEC215/2000, which was a direct threat to indigenous territorial rights by moving the responsibility for the demarcation of indigenous territories from the executive to the legislative branch and by opening concluded demarcation processes up for reconsideration. JS6 noted that PEC215/2000 was the most dangerous legislative initiative to the rights of indigenous peoples and quilombola communities.¹⁷⁵

96. JS9 expressed that the recommendations aimed at ensuring the rights of indigenous peoples and afro-descendants 119.162¹⁷⁶ and at ensuring territorial and cultural rights of indigenous peoples 119.163, 119.169,¹⁷⁷ were not fully implemented.¹⁷⁸

97. JS6 asserted that FUNAI experienced a serious shrinkage of staff and resources, and even had several of its units attacked by anti-indigenous movements, including the destruction and burning of buildings and official vehicles, and staff threatened.¹⁷⁹ JS22 noted that FUNAI operated with only 36% of its capacity.¹⁸⁰ STP CH asserted that FUNAI was not capable of fulfilling the tasks defined in the Brazilian constitution.¹⁸¹

98. JS8 noted that, notwithstanding the adoption of legislation on policies to protect isolated peoples, there is a need for greater investment in FUNAI and the Special Secretariat for Indigenous Health (SESAI).¹⁸² JS8 reported that, since 2014, a series of contacts have taken place with isolated indigenous peoples along the Brazil-Peru border and that emergency action is therefore required to ensure the physical and cultural survival of these peoples.¹⁸³

99. JS12 referred to the adverse effects of a cluster of large-scale public/private port and industrial projects near Recife.¹⁸⁴ Articulação Nacional de Quilombos (ANQ) noted intense pressures of the “Condomino Estrondo” (Formosa do Rio Preto, Bahia) against traditional communities.¹⁸⁵ JS27 reported that the Kanamari were harassed by the local population.¹⁸⁶

Migrants, refugees and asylum seekers and internally displaced persons¹⁸⁷

100. JS16 noted that Brazil has seen new migration flows in the past four years, including from Haiti and Africa, and a 2.868 per cent rise in asylum claims.¹⁸⁸

101. Regarding recommendation 119.170,¹⁸⁹ JS16 indicated that the Alien Statute was based on the assumption that migration posed a risk to national security and Brazilian workers. Moreover, it promoted selective migration, recognized rights only for resident migrants, denied migrants their political rights and made it impossible for individuals to regularize their migration status.¹⁹⁰

102. JS16 noted that many migrants and asylum seekers arriving in Brazil via Guarulhos International Airport (through the *Espaço Conector* in Terminal 3) have been prevented from either entering the country or continuing their journey on connecting flights.¹⁹¹
